Forecast for Friday 25 Nov 2022

Weather: Some early morning mist is possible in places. A few showers lingering in the morning period but these gradually fizzling out and longer bright or sunny spells developing. Mainly dry in the afternoon but feeling cool in the blustery winds. Increasing cloud spilling in from the west on Friday evening.

Chance of cloud-free hill tops above 800m: 70% associated with morning showers increasing to 90% as showers die out.

Low cloud and visibility: Low cloud associated with the showery rain in the early morning will mean layers of cloud above 600m around showers, the cloud will gradually thin and break with just patches around 800m by late morning. Visibility will be moderate in early showers or mist but will improve during the day and be very good during the afternoon with good views across the Lake District.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Risk of gale force gusts during the day around summits and ridges and feeling very cold in early showers and strong winds.

Forecast for Saturday 26 Nov 2022

Weather: Cloudy overnight with some mist and fog patches developing around dawn. It will be quite a dull morning with some drizzle possible but dry for many. Rain and gales spreading east in the afternoon with most places wet by late afternoon. Rain is likely to become persistent during the evening, perhaps some breaks further east.

Maximum wind: Southerly 30mph with gusts 45-50mph.

Chance of cloud-free hill tops above 800m: 80% falling to 40% as cloud thickens during the afternoon.

Low cloud and visibility: Patches of low cloud turning more scattered above 600m in the morning with visibility below the cloud turning moderate during the morning, cloud will lower and thicken in the afternoon. Northern Fells will see more breaks and less cloud in general. By late afternoon broken cloud above 400m is likely around southern fells and in the rain visibility is likely to be poor at times.

Temperature: **Valleys:** Plus 10 Celsius.
At 800m: Plus 5 Celsius.
Freezing level: Above all summits.
